Finishing Touches

Add color and texture with trim finishes and hardware that enhances design and function.

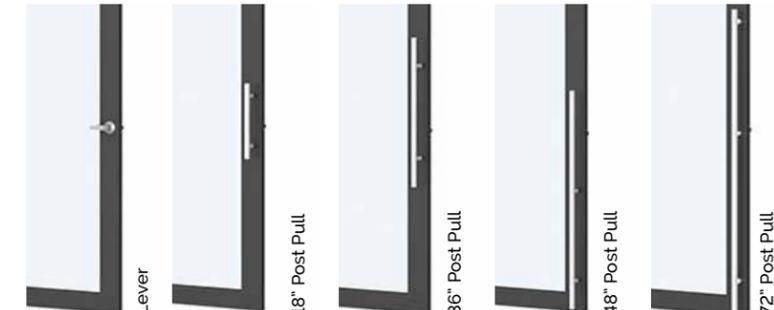

Trim Options

Trim Finish: Choose from 15 options

Pulls: Choose among 5 styles of door hardware

Universal Track System™

Titan is constructed around a Universal Track System that utilizes the same parts for a more streamlined and easier installation. These common components also allow you to make changes faster in the future.

Enhanced Sound Control

Titan's double sided glazing offers higher sound transmission control for your space.

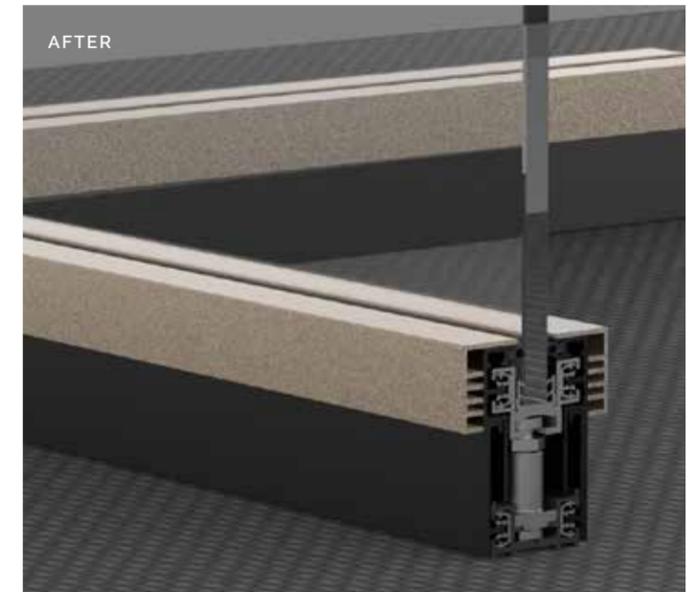

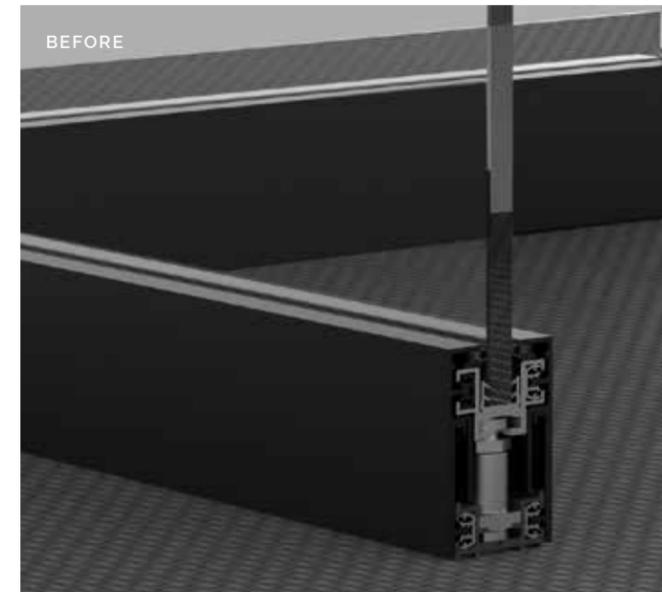

Evolve to the space you need next

Single to Double

All of our trim options are designed to add glass panels without changing underlying wall structure or track.

The Titan dual glazing provides a 42 to 49 STC. By switching to double pane you'll have greater acoustic privacy.

New Look

Updating trim provides fresh and cost efficient opportunities to shape a space's visual identity.

By simply adding an accent trim to the existing layout you can elevate the look and the feel of the space.

Smarter for the planet, smarter for your business

Less Waste

Modular walls are constructed with up to 90% less waste than traditionally-framed walls. The majority of Titan components are made from aluminum, MDF, steel and glass, resulting in a wall system that is recyclable.

*Less Cost**

Designed to be rearranged, reconfigured, and reused for years to come. Capturing asset depreciation is a powerful cost-saving tool that can greatly reduce a business' tax obligations.

*Versus Traditional Construction.

Less Hassle

Titan is designed and engineered to perform and is backed by an industry-leading lifetime warranty.

End-to-End Service

When you partner with Fellowes, you are supported by fully-integrated design, planning, production, and installation teams – all working together to deliver extraordinary final results for every indoor environment.
